WHY I STUDIED THE MASTER DEGREE IN ANIMAL LAW AND SOCIETY?

"I chose this master, as well as being a new area of Law, to study the different positions in which man perceives the animals and listen to the problems one can encounter in this area in order to find the best solution to these problems. I wanted also to uplift my knowledge not only in Law discipline but also within ethics, philosophy, ethology, biology among others. My main final goal is to set the best possible protection for all the animals located in my country (Mexico)."
